Objective

Results-driven software engineer with strong foundations in full-stack development and machine learning, as demonstrated through academic projects and internship experience at Philips. Seeking an opportunity to leverage my skills while contributing to innovative software solutions.

Education

Lovely Professional University, Phagwara, India
Integrated (B. Tech + M. Tech) Degree in Computer Science, GPA: 7.73
Graduated in June 2024

Key Skills

Languages: C#, Python, C++

Frameworks: .NET, Django

Web Technologies: HTML, CSS, Tailwind CSS

Machine Learning: TensorFlow, Keras, Neural Networks

Developer Tools: Git, Jira, Linux, RTC

Testing: Unit Testing, Integration Testing, Test Automation

Others: Agile/Scrum, Problem Solving

Experience

Software Engineer Intern, Philips

Aug 2023 – Jun 2024

- Orchestrated successful migration from IBM RTC to Git, implementing structured repository architecture and branch management strategies
- Improved development workflow by establishing code review processes and implementing best practices for code quality
- Led critical .NET framework upgrade initiative, enhancing application security and performance metrics.
- Developed automated test suites, increasing code coverage by 6% across multiple repositories
- Collaborated with cross-functional teams to maintain CI/CD pipelines and ensure code quality

Selected Projects

Spices Exporter Website with E-commerce Functionality

Aug 2024 - Dec 2024

- Designed and developed a fully functional e-commerce platform for exporting spices globally.
- Implemented a shopping cart system with secure checkout and order tracking.
- Technologies: Django, HTML, Tailwind CSS, JavaScript, PostgreSQL

Deep Learning in Healthcare Informatics

Jan 2022 - Mar 2024

- Engineered a deep learning system to analyze patient data and generate treatment recommendations
- Implemented data preprocessing pipeline for medical records, achieving 85% accuracy in recommendations
- Technologies: Python, TensorFlow, Keras

Stock Market Prediction Model

Jan 2022 - Jun 2023

- Developed a neural network model for stock price prediction with 82% accuracy rate
- Implemented RSI technical indicator integration for improved prediction accuracy
- Technologies: Python, Neural Networks, Pandas, NumPy, Scikit-learn

Languages

English (Fluent), Hindi (Native), Marathi (Native)
